**7.1. NiAs**

NiAs-Struktur (NiAs<sub>6</sub>-Oktaeder)

| B-Element | EN  | Bereich der c/a-Verhältnisse |
|-----------|-----|------------------------------|
| S         | 2.5 | 1.54 - 1.75                  |
| Se        | 2.4 | 1.46 - 1.74                  |
| Te        | 2.1 | 1.37 - 1.66                  |
| As        | 2.0 | 1.39 - 1.53                  |
| Sb        | 1.9 | 1.25 - 1.40                  |
| Bi        | 1.9 | 1.31 - 1.42                  |
| Ge        | 1.8 | 1.25 - 1.27                  |
| Sn        | 1.8 | 1.21 - 1.40                  |

**7.2. Varianten des NiAs-Typs (CdI<sub>2</sub> und Ni<sub>2</sub>Ge)**

CdI<sub>2</sub>-Struktur (CdI<sub>6</sub>-Oktaeder)

Ni<sub>2</sub>Ge-Struktur (NiGe<sub>6</sub>: Oktaeder; NiGe<sub>5</sub>: trigonale Bipyramiden)

**7.3. Pyrit-Typ**

Pyrit-Struktur

**7.4. MoS<sub>2</sub>-Typ**

MoS<sub>2</sub>-Struktur (MoS<sub>6</sub>: trigonale Prismen)
